Caol Ila 2008 57.9% Cask Strength	£18.95	Crabbles 22yrs 47.5%	£20.95
A classic limited release Islay malt distilled in 2008 & matured for 15 years in a refill American Hogshead. Smoky with peanut brittle giving way to honey and floral influences. A spicy finish with citrus and bonfire embers.		This was initially matured in ex-bourbon casks and finished in a hand-selected Palo Cortado sherry cask. Notes of berries and cream, caramel, toffee, dried fruit, dark chocolate, coffee, black pepper, and lingering waves of smoke.	
Dalmore 2005 56.2% Cask Strength	£20.95	Tomatin 18yrs 46%	£16.95
This distillery is located in Alness, sitting on the banks of the Cromarty Frith overlooking the Black Isle. Tart grapefruit flavours give way to soft vanilla pods and sweet honeycomb. A medium-bodied finish with tropical fruits and spice.		Tomatin was the first Scottish single malt maker to be purchased by a Japanese company in 1986. Finished in Oloroso Sherry cask, this is truly a world-class malt with dried apricot, nougat and distinctive nutty flavours developing into bursts of tropical fruit with mellow undertones.	
Tobermory 21yrs 46.3%	£19.95	Glenrothes 2007 62.7% Cask Strength	£17.95
This malt was finished in ex-oloroso sherry casks, chosen to create flavours reminiscent of foraged fruit found scattered across the distillery's home on Mull. Aromas of toffee, marzipan, treacle, toasted hazelnuts, and furniture polish fill the nose with sticky toffee throughout the palate, lingering in the finish.		This was bottled October 2023 at an impressive 62.7% Vol., without chill filtration or any additional colouring. Morello cherry flavours combine with peanut brittle & raspberry. A medium-bodied finish with oak & toasted almonds.

Wine List

The selection that follows has been chosen to reflect the diversity of fruit, style and regions that the world of wines has to offer. Most of the wines on our list are produced by independent wine growers and we feel their individualities complement the style of our cuisine. Each wine has excited us during tasting and we are sure that you will enjoy drinking them too.

Organic producers will only make good wine if they also made good wine before becoming organic. This may seem self-evident, but organic certification is – at its simplest – adhering to a list of chemicals not to add to your vineyard.

Wines (by the bottle only)

Biodynamics requires a much greater commitment from the grower and is often referred to as "super-charged" organics. Practices take into account the seasons as well as lunar and solar rhythms, which would not have seemed strange to our ancestors. For many it is a practical and sustainable farming solution and biodynamic certification is a sound guarantee of responsible environmental practice.
